
Dependence Chart

with the basic material, I give approximately ten pop quizzes per semester that typically involve stating a definition, giving an example, or stating a major theorem.

At the University of North Texas, abstract algebra is a two-semester sequence. The first semester is required of all math majors and the second semester is optional. Because most students opt not to continue with the second semester, it is not offered every year. When I teach either class, I give three 50-minute in-class exams. With exam reviews and going over completed exams, this leaves approximately 36 class periods for new material.

In the first-semester class, the base material I always cover includes Sections 0-6, 8, 9, 12, 13, and 22-25. I average approximately two class periods per section, so I can usually cover a few more sections. Options I have used for the remaining time include
